

**INTERNATIONAL UNION OF GEODESY AND GEOPHYSICS
UNION GEODESIQUE ET GEOPHYSIQUE INTERNATIONALE**

NEWS RELEASE

5 November 2018

Ten scientists have been awarded today the Early Career Scientist Awards of the International Union of Geodesy and Geophysics (IUGG) for their outstanding research in Earth and space sciences and for their international research cooperation:

Juan Carlos Afonso (Australia), Seismology

Amir Agha Kouchak (USA), Hydrology

Emilie Capron (United Kingdom), Climatology

Ira Didenkulova (Russia), Oceanography

Marie Dumont (France), Cryospheric Sciences

Binbin Ni (China), Aeronomy

Katrin Schröder (Italy), Oceanography

Flavia Tauro (Italy), Hydrology

Takeshi Tsuji (Japan), Seismology

Qiuzhen Yin (Belgium), Climatology

IUGG Early Career Scientist Awards will be presented at the 27th IUGG General Assembly in Montréal, Canada, on 13 July 2019 during the Award Ceremony. The awardees will give a talk at the Union Symposium U9 “Celebrating Early Career Scientists” to be held on Friday, 12 July, and Saturday, 13 July 2019. All Assembly delegates are welcome to attend the symposium.

International jury

The Award Committee was chaired by Jenny Baeseman, University of Alaska, Fairbanks (USA). The Members of the Committee were Gregory Foltz, NOAA, Miami (USA); Salvatore Grimaldi, University of Tuscia, Viterbo (Italy); Futoshi Takahashi, Kyushu University, Fukuoka (Japan); and Thorsten Wagener, University of Bristol, Bristol (United Kingdom).
